The Resurfacing Log on Your Phone — Crew Guide

1 · Open the log

1. Log in at **icewrightapp.com** and tap your rink on the Dashboard.

2. Tap **Operations**, then **Ice work**, then **Resurfacing**, and tap **Open the driver log (phone)**.

*Tip: tap **Add to phone…** on the log page to put it on your home screen as its own small app — one tap from the driver's seat next time. On a desktop the button shows a QR code your phone can scan.*

2 · Log a run

1. Time and **Operator** are already filled in — the time is now, and the log remembers who drives from this device. Fix either if needed.

2. Activity is set to Resurface; change it for an edge, paint, or flood-only run.

3. Fill your rink's columns — the classic sheet is water temp, blade/shave, ice quality, and notes, but your rink may have its own (a “Time off” column, preset picks, checkboxes…).

4. Tap **Log this resurface** and wait for ✓ **Logged**. Done — the run appears under **Today** below the button.

3 · Preset answers

Some columns offer preset answers instead of a blank box. A **dropdown** means pick exactly one; a row of **tappable buttons** means pick one or more (tap again to un-pick). The log won't save until every preset column has its answer — it tells you which one it's waiting on.

4 · Where the entries go

Every run lands in the rink's one maintenance log — the full history and the who-did-what activity feed see it. Nothing to copy anywhere.

*Clipboard crew? **Print the blank wall sheet** (link at the bottom of the log page) — it prints your rink's exact columns, preset options included, for the Zamboni-room wall.*

5 · For the rink owner — make the form yours

Edit fields (top of the log page, owners only): rename, add, or remove columns — up to ten. Types: free text, number, checkbox, time, a 1–5 quality pick, or preset options the driver must pick from. **Time, Operator, and Activity are always there.**

Adding a preset column? Type its options comma-separated (“Game cut, Practice cut, Flood only”). Save, and the phone form and the printable wall sheet both switch to your columns immediately. Old entries keep the column names they were written under.
